BCNY
NEW FINISHES
BY FONT BARCELONA

The New finishes by Font Barcelona are inspired by the industrial architecture of Barcelona and New York symbolised by Rafael Guastavino’s journey.

He applied the materials and aesthetic and building resources he learned about during his training in Barcelona, combining them with the technological setting and materials typical of New York’s vanguard.

In industrial architecture, decorative and structural features intermingle to create a unique and deeply inspiring aesthetic.

Materials shared in the two cities, unique textures in which craftsmanship, a human imprint and the passage of time, all define their character and aesthetic.

The artisan tradition of Font Barcelona is strengthened and maximised in Bridge and 5.1, with handmade textures in brass, copper and steel. Iron was added for the first time.

With great character, the metal is treated by hand, and piece by piece, to confer an incomparable appearance to each plate, with swirls ranging from black to grey with an iridescent sheen.
